

RABIES

WHAT TO DO?

If you see or encounter any animal that you know or suspect has rabies the first step is to call Public Health at **811** to make a report. The process for dealing with infected animals begins with Public Health who in turn works through a process with the Department of Natural Resources to address the situation. For detailed information about rabies go to www.gnb.ca/naturalresources, click on Wildlife then click on Wildlife Related Diseases.
